

Curb Pet Overpopulation

Pet overpopulation is a tremendous problem that can be solved if each of us takes one small step -- spaying or neutering our pets. Affordable Spay Neuter Clinic provides low cost spaying and neutering to help stop pet over population. We have performed many thousands of spays and neuters since 1987 for rescue organizations and in private hospitals. This experience allows us to provide speedy, efficient surgery without sacrificing patient welfare.

Affordable SPAY Neuter Clinic

is located in the lower level of Diane's Discount Pets and Adoption Center in Pottstown. The Clinic houses treatment facilities, a dual surgical suite, and recovery area. We perform presurgical exams on all pets before surgery, provide quality anesthesia and pain relief medications, and utilize only sterilized surgical instrument packs for each procedure. We insure a low stress, high quality surgical experience for rapid recovery and minimal complications.

It Begins With You

According to the Humane Society of the United States, every year, between six and eight million dogs and cats enter U.S. shelters; some three to four million of these animals are euthanized because there are not enough homes for them. You can help fix this problem simply by having your pet spayed or neutered. Affordable Spay Neuter Clinic's mission is to help make this happen.

Call (610) 970-4173 or visit www.affordablespay.com for information.

Our Mission

Affordable Spay Neuter Clinic's mission is to sterilize all the cats and dogs that we can to help curb pet overpopulation in our area. Because this is our mission, we are able to dedicate every square foot and surgical instrument to spaying and neutering. Since we don't have to support other hospital services (radiology, pharmacy, exam rooms, medical wards, etc.) through high surgery fees, we are better able to keep our costs down. This in turn enables us to provide services that are more affordable and therefore, available to more people so we can make a greater impact.

Our Team

We utilize skilled volunteers and paid technical staff to work as a team. Leading the charge is Steven M. Silberman, D.V.M. Dr. Silberman has worked for over 20 years as a veterinary practitioner doing everything from treating wildlife (snakes, bears, wolves, cougars, etc.) to hundreds of nights as an emergency room veterinarian to performing thousands of surgeries for shelters.

Our Services

Affordable Spay Neuter Clinic offers the following services for our patients:

- **Surgery** – Spaying and neutering, retained puppy teeth extractions, puppy hernia repairs, and miscellaneous minor surgeries
- **Vaccine prophylaxis** – vaccinations and testing while admitted for surgery
- **Minor medical treatments** – including ear mite treatment, nail trims and anal sac expression
- **Low cost Vaccine Clinic** – Usually the first Saturday of each month at Diane's Discount Pet Supplies and Adoption Center. Visit www.ddpets.com to check the date.
- Sorry, we are not equipped to treat sick animals
