Wilson Legal Solutions Introduces Wilson Analytics Professional Solution

*New Software to Enable In-Memory Analysis and Queries of
Elite 3E Data and to be featured at VANTAGE 2014*

NEWTOWN SQUARE, PA (June 10, 2014)....Wilson Legal Solutions, a provider of software and services to enhance law firm profitability and productivity, is pleased to announce the introduction of the Wilson Analytics Professional solution. The software enables in-memory analysis and queries of Elite 3E data.

Wilson Analytics Professional helps law firms convert complex and detailed transactional information into KPIs that can be easily visualized and consumed. Law firms can use the software to aggregate and analyze 3E data for fast, secure, and lightweight access using standard Microsoft products such as Excel, Power Pivot, and Power View. Wilson Ideate Technology, in development, enables dashboard-based visualizations that are mobile, customizable, and work with Wilson Analytics Professional and external data sources.

“We live in an increasingly digital world. Law firms, like many businesses, need to develop a Big Data strategy to make use of high-volume, high-velocity, and high-variety data. Law firm decision makers need direct access to their data to query and analyze it. And they should be able to access it wherever they are – on the road, at a client site, and in court,” says Greg Murphy, senior director of Wilson Legal Solutions. “Wilson Analytics Professional enables these capabilities.”

Additional features of the software include the Wilson Partition Manager that enables incremental updates to the aggregated 3E data. The Wilson Security Manager enables firms to effectively compartmentalize law firm data and allow access by user role. The software also features preconfigured visualizations of key performance indicators such as productivity and inventory, profitability, general ledger, business development, and full-time equivalents.

Wilson Legal Solutions will display the software in its booth at VANTAGE 2014, the worldwide conference of Thomson Reuters Elite taking place June 23 to 26, 2014 at the Marriott Marquis New York. The software will also be featured during an educational session entitled “Access, Analyze, and Visualize Elite 3E Data” during the conference. For details visit www.wilsonlegalsol.com/uc14.
